Action Items: County Special Districts – Pamela Vandervoort

Ms. Vandervoort explained the process required to create a street light assessment district through County Special Districts. Special Districts will put together a proposal that will include cost estimates per household to install and maintain streetlights on the intersections of Muscoy. Once a proposal has been recommended by the MAC and approved by the Supervisor, Special Districts will generate a survey and mail it directly to all of the property owners in the proposed area. The property owners will have the option of supporting or not supporting the proposed street light district. If the survey yields positive results, Special Districts will move forward with a formal ballot election for the street lighting district. Ms. Vandervoort stated that because of vacation scheduling in July and the amount of time that it would take to research and generate the necessary information, that she would present a detailed report at the August MAC meeting.

Council Member Duarte moved to recommend that Special Districts create two proposals for the installation and maintenance costs of streetlights—one proposal for streetlights at every intersection, and the second proposal for streetlights every 200 feet. It is also requested that Special Districts present the proposals at the August MAC meeting.

Council Member Smith seconded the motion and all were in favor.
